**SECTION IV - Reactivity Hazard Data**

**STABILITY:**        **stable:** X                                **unstable:**  
**HAZARDOUS POLYMERIZATION:**        **may occur:** X                                **will not occur:**

**CONDITIONS TO AVOID:**        Direct sunlight, moisture, and heat.

**INCOMPATIBILITY:** Polymerized by contact with water, alcohols, amines, alkalies, cotton or wool.

**HAZARDOUS DECOMPOSITION PRODUCTS:**        None

**SECTION V - Health Hazard Data**

**PRIMARY ROUTES OF ENTRY:**        **INHALATION:** X                                **INGESTION:** X                                **SKIN ABSORPTION:** X

**EYE CONTACT:**        Can cause irritation of the eyes. Can bond eyelids together. Wash thoroughly with warm water and apply gauze patch. Get medical attention. The eye will open without further action, typically in 1 to 4 days. **DO NOT try to open the eyes by physical manipulation.** Adhesion to eye proteins will disassociate over several hours. This will cause periods of weeping. Seek medical attention.

**FIRST AID:**

**SKIN CONTACT:**        Can cause irritation, bonding and drying of the skin.

Immerse bonded surface in warm soapy water. Peel or roll surface apart with the aid of a blunt instrument. Remove the adhesive from skin with warm, soapy water. DO NOT try to pull bonded surface apart as you may rip or tear your skin. Seek medical attention

**FIRST AID:**

**INHALATION:**        Vapor may be mildly irritating.

**FIRST AID:**        This vapor is relatively harmless. Remove victim to fresh air. Seek medical attention

**INGESTION:**        Relatively unlikely since material will solidify and adhere to the mouth.

**FIRST AID:**        Saliva will lift the material in approximately one half to 2 days. In case a lump forms in the mouth, position the patient to prevent ingestion of the lump when it detaches thus preventing choking. Seek medical attention.

**CHRONIC EFFECTS:**        Not determined

**Carcinogenic:**        Not listed.

**RESPIRATORY PROTECTION:** If there is a potential to exceed exposure limits, use an approved respirator.

**PROTECTIVE GLOVES:** Polyethylene gloves, DO NOT use cotton.

**EYE PROTECTION:** Vapors are highly irritating to eyes vapor proof goggles should be worn.

**VENTILATION TO BE USED:** LOCAL EXHAUST: MECHANICAL: SPECIFIC:  
OTHER (specify): Positive down -draft exhaust ventilation should be provided to maintain vapor concentration below TLV

**PROTECTIVE CLOTHING AND EQUIPMENT:** Polyethylene apron.

**HYGIENIC WORK PRACTICES:** Always wash after using material.

**SECTION VII - Precautions for Safe Handling and Spill/Leak Procedures****STEPS TO BE TAKEN IF MATERIAL IS SPILLED OR RELEASED:**

Flood with water to polymerize material. Soak up with absorbent material.

**WASTE DISPOSAL METHODS:** Collect polymerized material and dispose of according to local, state and federal regulations.

**SAFE HANDLING AND STORAGE:** Store at or below 75°F to maximize shelf life.

**OTHER PRECAUTIONS AND SPECIAL HAZARDOUS INFORMATION:**  
Avoid contact with skin and eyes. Avoid breathing vapors.
